

# Technology

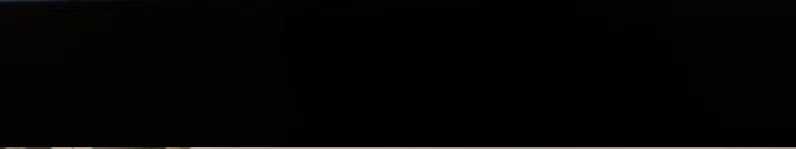

The Eaton Public Library is committed to being a leading technology hub for the town of Eaton. We are proud to offer a wide range of free technology services to our patrons, including access to our spacious computer lab and free printing. We continuously strive to upgrade our technology offerings to meet the ever-evolving needs of our community. One of our most exciting technological features is our fully equipped Maker spacelab, which includes cutting-edge equipment such as a Glowforge Laser cutter, 3Dprinter, and a Cricut Maker 3. Additionally, we offer an iMac with the full Adobe Creative Suite installed, providing our patrons with access to professional-grade design and editing software. Our mission is to provide unparalleled technology services to the town of Eaton and empower our citizens to explore and learn new technologies. Whether you're looking to start a new project, learn a new skill, or just need assistance with a technology-related issue, we're here to help. Visit us today to take advantage of all the technology resources available at the Eaton Public Library

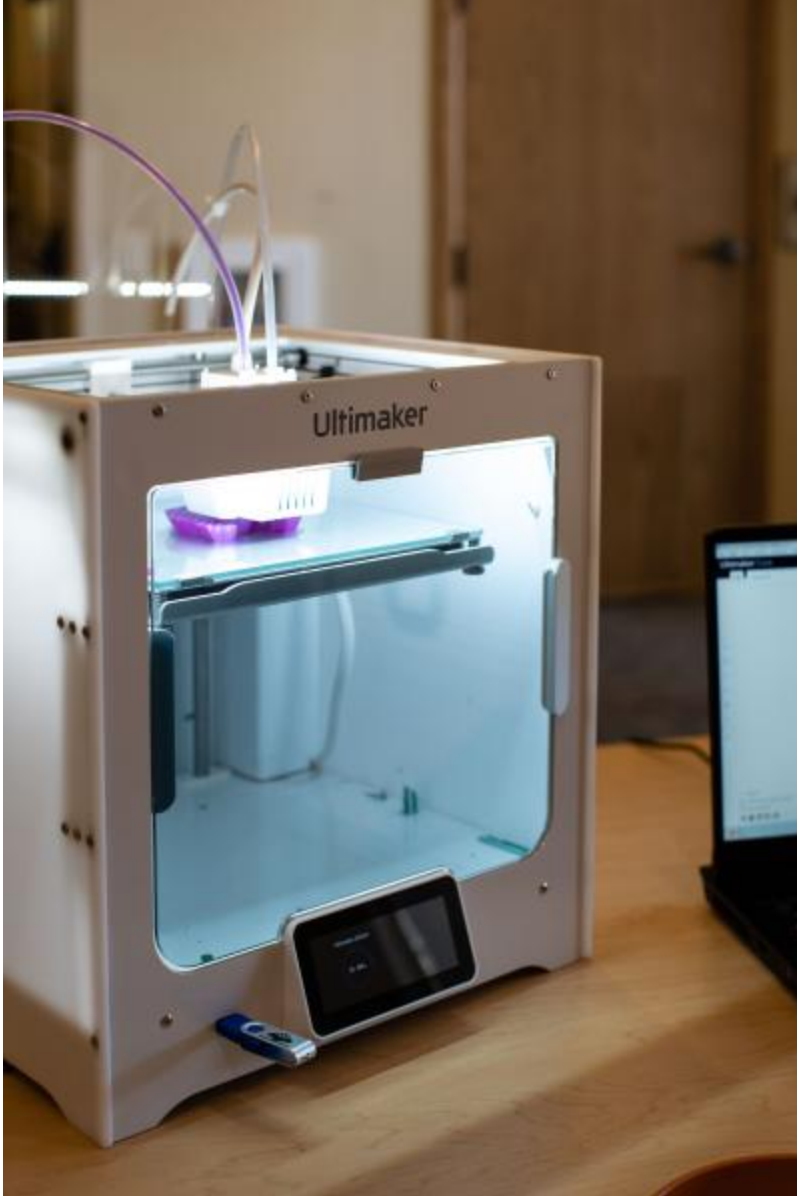

Technology services!
